DETAILED ACTION

Amendment

1. Acknowledgment is made of Amendment filed September 26, 2005.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Soscia (US 6,636,332).

Soscia teaches a method of providing a machine-readable indicia (40) on a media having a protective overlayer comprising the steps of

providing a first machine-readable indicia (image 20 of a subject 30, wherein the subject 30 may be a human subject, an inanimate object or alpha-numeric lettering (column 3, lines 23-30); image 20, which is captured by digital camera 119 (column 4, lines 47-49), which is machine-readable) in an image layer on the media (50; e.g., the image 20, which is printed on a first recording medium 50 (column 4, lines 20-22)); and

providing a second machine-readable indicia (40, which is preferably in the form of a two-dimensional encoded variable... (column 3, lines 48-52; column 5, lines 53-57; column 5, lines 48-51)) in a protective overlayer (100) that is identical in content to (the indicia 40, which is digitally representing image 20 (column 3, lines 34-38)), and in register with the first machine-

readable indicia in the image layer (the indicia 40, which is imprinted onto any desired portion of the original image 20 or may be appended to image 20 (column 3, lines 34-38)) (column 3, line 15 through column 5, line 66).

Response to Arguments

4. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection as set forth in the instant Office action.
